

The United Arab Emirates

Illustrative Human Capital Indicators

This country profile presents a snapshot of illustrative indicators to guide discussions during the Annual Meetings while the set of more strategic indicators are under development. It is intended to be a conversation starter on where a country is on various aspects of human capital development and, as such, it includes indicators from various sectors. It is to be noted that not all the indicators included here are relevant for each country. Information contained here should be complemented with other more context-specific indicators.

In the United Arab Emirates the productivity as a future worker of a child born today is **66 percent** as much as it could be. The country ranks **49 out of 157** in the global HCI. For more information on human capital outcomes and the HCI, please see the country two-pager on www.worldbank.org/en/publication/human-capital.

ILLUSTRATIVE OUTCOME AND OUTPUT INDICATORS

- **Women, Business and the Law Index.** This index measures gender equality in the law (how the economic decisions women make are affected by the law), with a larger value showing higher gender equality. In the United Arab Emirates, the value is **29** out of 100. This is lower than both the average for its region (49) and the average for its income group (83).
- **Adolescent Fertility Rate.** In the United Arab Emirates, there are **7 births** per 1,000 women ages 15-19. This is lower than both the average for its region (24) and the average for its income group (15).
- **Contraceptive Prevalence.** In the United Arab Emirates, data on contraceptive methods do not exist. In the country's region, **48 percent** of women ages 15-49 uses some form of contraceptive method, and in the country's income group, ****48 percent** uses it.
- **Social Protection Coverage.** In the United Arab Emirates, data on the percentage of the population that is covered by social safety nets do not exist. The average for the country's region is 45 percent and for its income group is 45 percent.
- **Open Defecation.** In the United Arab Emirates, **0 percent** of the population practices open defecation. This is lower than both the average for its region (2) and the average for its income group (0).
- **Hygiene.** In the United Arab Emirates, data on the percentage of the population that has basic hygiene services (soap and water) do not exist. The average for the country's region is 78 percent and for its income group is 89 percent.
- **Source of Drinking Water.** In the United Arab Emirates, **98 percent** of the population has at least basic source of drinking water. This is higher than the average for its region (94) but lower than the average for its income group (99).
- **Cooking Fuel.** In the United Arab Emirates, **99 percent** of the population primarily uses clean cooking fuels. This is higher than the average for its region (91) but is similar to the average for its income group (99).
- **Access to Electricity.** In the United Arab Emirates, **100 percent** of the population has access to electricity. This is higher than the average for its region (95) but is similar to the average for its income group (100).
- **Road Traffic Deaths.** In the United Arab Emirates, for every 100,000 people **18 people** die due to road traffic injury. This is similar to the average for its region (18) but higher than the average for its income group (8).

1. Key Indicators on Human Capital

- Large circle=United Arab Emirates ; small circles=other countries.
 - Vertical lines separate terciles of the distribution.
 - Colors indicate the terciles of the distribution across countries.

DOMESTIC RESOURCE USE AND MOBILIZATION

- **Health Spending.** The United Arab Emirates spends **2.5 percent** of its GDP on health. This is lower than both the regional average (3.1) and the average for its income group (5.6).
- **Education Spending.** The United Arab Emirates spends **1.8 percent** of its GDP on education. This is lower than both the regional average (4.5) and the average for its income group (4.7).
- **Social Assistance Spending.** In the United Arab Emirates, data on social assistance spending do not exist. The average for the country's region is 1 percent and for its income group is 1.9 percent.

2. Government Expenditure on the Social Sectors

- **Efficiency of Spending.** Given the lack of data, it is not possible to predict if the HCI in the United Arab Emirates is higher or lower than what would be predicted for its level of per capita government spending.

3. Spending on Health and Education and HCI

- A selection of 146 countries in the regression are displayed.

- **Domestic Resource Mobilization.** The tax revenue in the United Arab Emirates is **.1 percent** of GDP. This is lower than both the regional average (12.1) and the average for its income group (19.8).

4. Domestic Resource Mobilization

- A selection of countries are displayed.
- Countries with DRM greater than 33% of GDP are excluded.

OTHER RELEVANT INDICATORS

- **Human Capital Project.** The United Arab Emirates has signed up to be a member of the Human Capital Project.
- **Building Human Capital.** In the United Arab Emirates, data on the Country Policy and Institutional Assessment rating for building human resources do not exist. The average for the country's region is 3 percent and for its income group is . percent. This indicator assesses the national policies and public and private sector service delivery that affect access to and quality of health and education services.
- **Identification.** In the United Arab Emirates, **18.4 percent** of the population is not registered. This is lower than the average for its region (20.4) but higher than the average for its income group (12.4).

This country profile is based on most recent data available under the Human Capital Project, the World Development Indicators, Atlas of Social Protection - Indicators of Resilience and Equity (ASPIRE) and Identification for Development (ID4D).
