

Saudi Arabia

Illustrative Human Capital Indicators

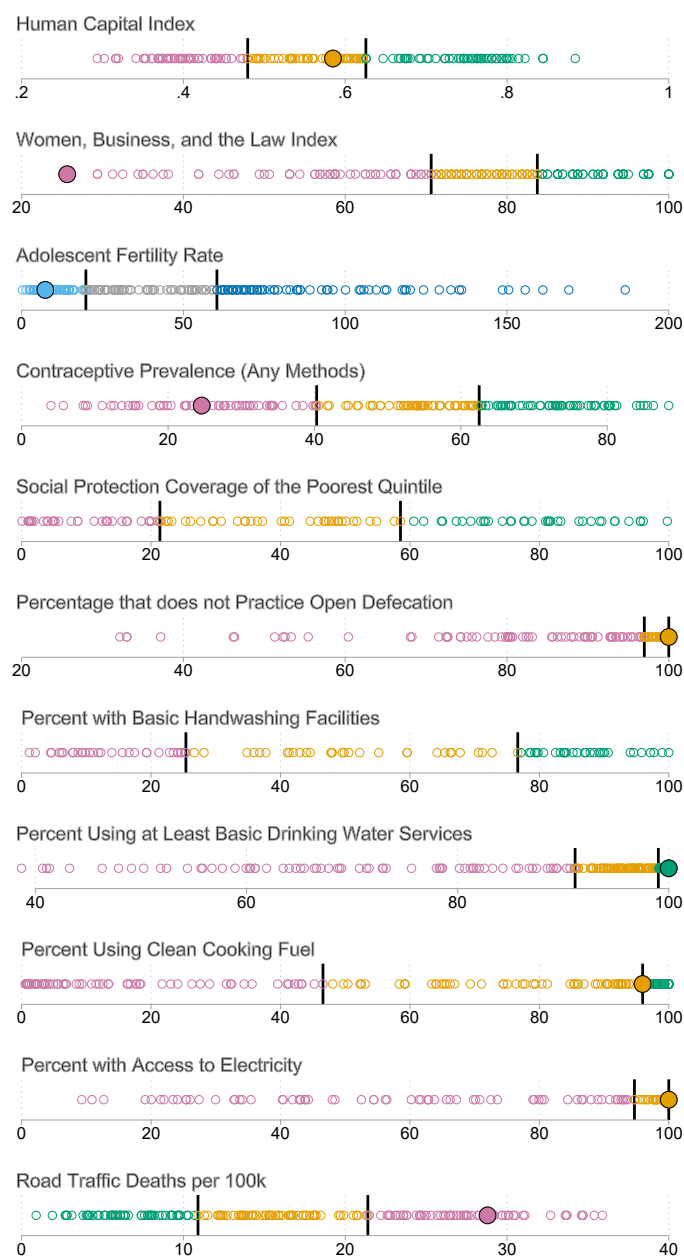

This country profile presents a snapshot of illustrative indicators to guide discussions during the Annual Meetings while the set of more strategic indicators are under development. It is intended to be a conversation starter on where a country is on various aspects of human capital development and, as such, it includes indicators from various sectors. It is to be noted that not all the indicators included here are relevant for each country. Information contained here should be complemented with other more context-specific indicators.

In Saudi Arabia the productivity as a future worker of a child born today is **58 percent** as much as it could be. The country ranks **73 out of 157** in the global HCI. For more information on human capital outcomes and the HCI, please see the country two-pager on www.worldbank.org/en/publication/human-capital.

ILLUSTRATIVE OUTCOME AND OUTPUT INDICATORS

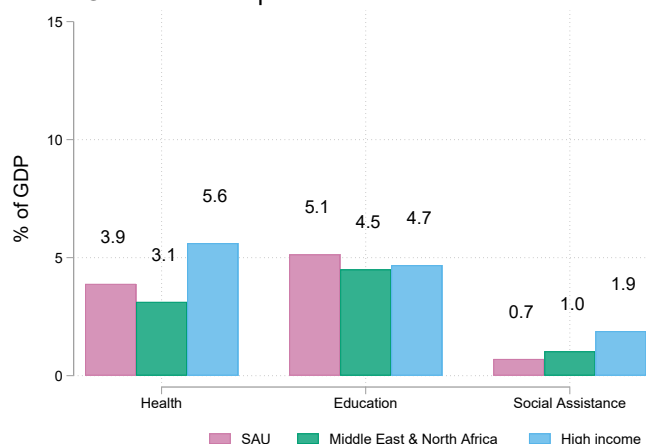

- **Women, Business and the Law Index.** This index measures gender equality in the law (how the economic decisions women make are affected by the law), with a larger value showing higher gender equality. In Saudi Arabia, the value is **26** out of 100. This is lower than both the average for its region (49) and the average for its income group (83).
- **Adolescent Fertility Rate.** In Saudi Arabia, there are **7 births** per 1,000 women ages 15-19. This is lower than both the average for its region (24) and the average for its income group (15).
- **Contraceptive Prevalence.** In Saudi Arabia, **25 percent** of women ages 15-49 uses some form of contraceptive method. This is lower than both the average for its region (48) and the average for its income group (65).
- **Social Protection Coverage.** In Saudi Arabia, data on the percentage of the population that is covered by social safety nets do not exist. The average for the country's region is 45 percent and for its income group is 45 percent.
- **Open Defecation.** In Saudi Arabia, **0 percent** of the population practices open defecation. This is lower than both the average for its region (2) and the average for its income group (0).
- **Hygiene.** In Saudi Arabia, data on the percentage of the population that has basic hygiene services (soap and water) do not exist. The average for the country's region is 78 percent and for its income group is 89 percent.
- **Source of Drinking Water.** In Saudi Arabia, **100 percent** of the population has at least basic source of drinking water. This is higher than both the average for its region (94) and the average for its income group (99).
- **Cooking Fuel.** In Saudi Arabia, **96 percent** of the population primarily uses clean cooking fuels. This is higher than the average for its region (91) but lower than the average for its income group (99).
- **Access to Electricity.** In Saudi Arabia, **100 percent** of the population has access to electricity. This is higher than the average for its region (95) but is similar to the average for its income group (100).
- **Road Traffic Deaths.** In Saudi Arabia, for every 100,000 people **29 people** die due to road traffic injury. This is higher than both the average for its region (18) and the average for its income group (8).

1. Key Indicators on Human Capital

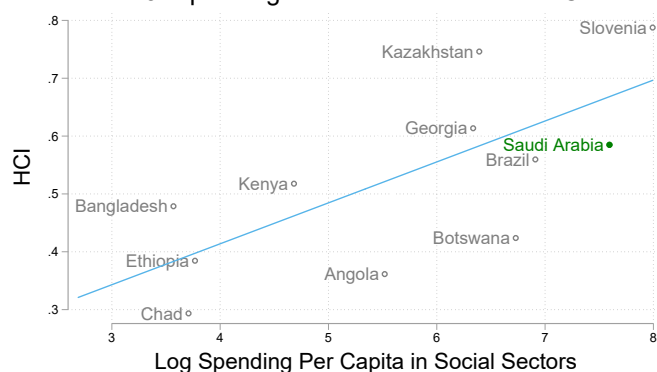

- Large circle=Saudi Arabia ; small circles=other countries.
 - Vertical lines separate terciles of the distribution.
 - Colors indicate the terciles of the distribution across countries.

2. Government Expenditure on the Social Sectors
