

St. Kitts and Nevis

Commitment to Human Capital - Scorecard

This scorecard presents a snapshot of the country's commitment to the human capital agenda and presents information on how the World Bank Group is supporting the government in the social sectors.

In St. Kitts and Nevis there are not enough data to calculate the productivity as a future worker of a child born today. The HCI has three components: survival to age 5, health, and education. For more information on human capital outcomes and the HCI, please see the country two-pager on www.worldbank.org/humancapitalproject

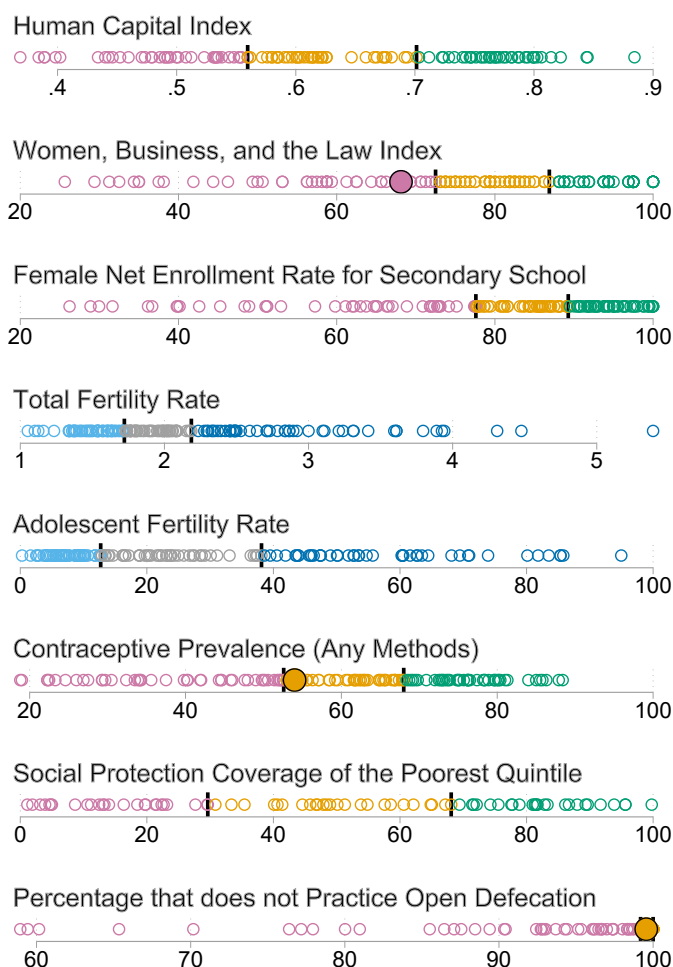

KEY OUTCOME AND OUTPUT INDICATORS TO MONITOR

- **Women, Business and the Law Index.** This index measures gender equality in the law (how the economic decisions women make are affected by the law), with a larger value showing higher gender equality. In St. Kitts and Nevis, the value is **68** out of 100. This is lower than both the average for its region (79) and the average for its income group (83).
- **Net Enrolment Rate in Secondary School.** In St. Kitts and Nevis, data on secondary net enrolment rates for girls do not exist. In its region 77 percent of girls of secondary-school age are enrolled in secondary school. The corresponding value for its income group is 77 percent.
- **Total Fertility Rate.** In St. Kitts and Nevis, data on the total fertility rate do not exist. The average for the country's region is 2 births per woman and for its income group is 2 births per woman.
- **Adolescent Fertility Rate.** In St. Kitts and Nevis, data on the adolescent fertility rate do not exist. The average for the country's region is 57 births per 1,000 women ages 15-19 and for its income group is 57.
- **Contraceptive Prevalence.** In St. Kitts and Nevis, **54 percent** of women ages 15-49 uses some form of contraceptive method. This is lower than both the average for its region (64) and the average for its income group (65).
- **Social Protection Coverage.** In St. Kitts and Nevis, data on the percentage of the population that is covered by social safety nets do not exist. The average for the country's region is 58 percent and for its income group is 58 percent.
- **Open Defecation.** In St. Kitts and Nevis, **0 percent** of the population practices open defecation. This is lower than the average for its region (3) but higher than the average for its income group (0).

DOMESTIC RESOURCE USE AND MOBILIZATION

- **Health Spending.** St. Kitts and Nevis spends **8.1 percent** of its government budget on health. This is lower than both the regional average (13.3) and the average for its income group (14.4).
- **Education Spending.** St. Kitts and Nevis spends **8.6 percent** of its government budget on education. This is lower than both the regional average (16.3) and the average for its income group (12.7).
- **Social Protection Spending.** In St. Kitts and Nevis, data on social protection spending do not exist. The average for the country's region is 10.7 percent and for its income group is 10.5 percent.

1. Key Indicators on Human Capital

- Large circle=St. Kitts and Nevis ; small circles=other countries.
 - Vertical lines separate terciles of the distribution.
 - Pink/light blue=1st tercile; orange/gray=2nd tercile; green/blue=3rd tercile

2. Government Expenditure on the Social Sectors

- **Efficiency of Spending.** Given the lack of data, it is not possible to predict if the HCI in St. Kitts and Nevis is higher or lower than what would be predicted for its level of per capita government spending.

- **Domestic Resource Mobilization.** The tax revenue in St. Kitts and Nevis is **18.6** percent of GDP. This is higher than the average for its region (17.9) but lower than the average for its income group (19.3).

OTHER RELEVANT INDICATORS

- **Human Capital Project.** St. Kitts and Nevis is not part of a network of countries committed to the Human Capital agenda.
- **Building Human Capital.** In St. Kitts and Nevis, data on the Country Policy and Institutional Assessment rating for building human resources do not exist. The average for the country's region is 3.9 percent and for its income group is . percent. This indicator assesses the national policies and public and private sector service delivery that affect access to and quality of health and education services.
- **Identification.** In St. Kitts and Nevis, **3.6 percent** of the population does not have proof of identity. This is lower than both the regional average (7.6) and the average for its income group (12.4).

- **Statistical Data on Human Capital.** In St. Kitts and Nevis, data on stunting rate and Harmonized Learning Outcomes are unavailable after year 2000.

HOW IS THE WORLD BANK SUPPORTING THE EFFORT?

The following table summarizes the World Bank's investments in Human Development for St. Kitts and Nevis, including measures of volume, performance, and other relevant indicators.

World Bank Investments in HD				
Indicator	HD	Edu	HNP	SPJ
HD Portfolio				
USD (million)
% of total
Diff. from regional average %
Diff. from income group avg %
HD FY 20 Lending Program				
USD (million)
% of total
Diff. from regional average %
Diff. from income group avg %
HD Performance				
Average Development Outcome
Diff. from regional average %
Diff. from income group avg %
% Satisfactory DO
Average Implementation Progress
Diff. from regional average %
Diff. from income group avg %
% Satisfactory IP
Disbursement ratio
Diff. from regional average %
Diff. from income group avg %
Other indicators				
Average project size (USD mill.)
Diff. from regional average %
Diff. from income group avg %
% of portfolio that is co-TTL'd
Diff. from regional average %
Diff. from income group avg %

Note: a) **Pink** indicates that the value is within the first tercile of the distribution for all the countries. **Orange** indicates that the value is within the second tercile. **Green** indicates that it is within the third tercile. b) FY20 lending program includes only projects rated A and B. c) DO and IP are on a scale of 1 to 6 where 1 is Highly Unsatisfactory and 6 is Highly Satisfactory. d) Data as of September 5, 2019.

This scorecard is intended to be a conversation starter on where a country is on various aspects of human capital development and the state of the World Bank's support in the social sectors. The choice of indicators is, to a large extent, driven by what is most relevant for the two regions with the lowest HCI scores (Sub-Saharan Africa and South Asia). As such, not all the indicators included here are relevant for each country. The scorecard should be complemented with other more context specific indicators.

The sources of data for the different indicators include: the Human Capital Project, the World Development Indicators, and the World Bank's internal system to monitor investments.

For more information, please contact the Human Capital Project team: HCP_Team@worldbank.org
