Uruguay

Illustrative Human Capital Indicators

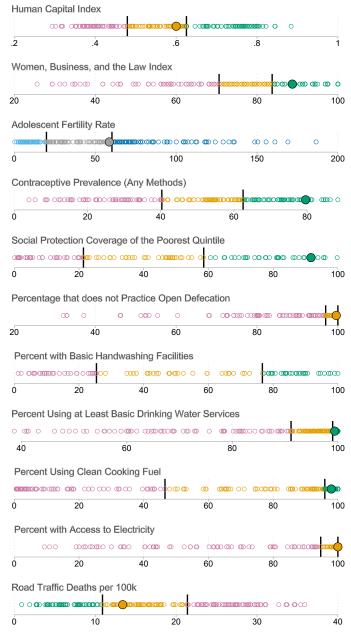

This country profile presents a snapshot of illustrative indicators to guide discussions during the Annual Meetings while the set of more strategic indicators are under development. It is intended to be a conversation starter on where a country is on various aspects of human capital development and, as such, it includes indicators from various sectors. It is to be noted that not all the indicators included here are relevant for each country. Information contained here should be complemented with other more context-specific indicators.

In Uruguay the productivity as a future worker of a child born today is **60 percent** as much as it could be. The country ranks **68 out of 157** in the global HCI. For more information on human capital outcomes and the HCI, please see the country two-pager on www.worldbank.org/en/publication/human-capital.

ILLUSTRATIVE OUTCOME AND OUTPUT INDICATORS
