Costa Rica

Illustrative Human Capital Indicators

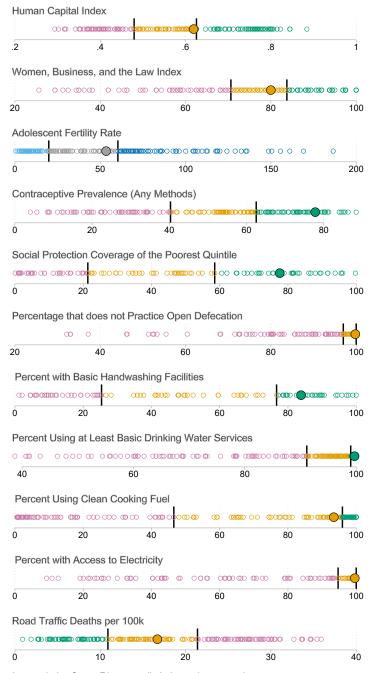

This country profile presents a snapshot of illustrative indicators to guide discussions during the Annual Meetings while the set of more strategic indicators are under development. It is intended to be a conversation starter on where a country is on various aspects of human capital development and, as such, it includes indicators from various sectors. It is to be noted that not all the indicators included here are relevant for each country. Information contained here should be complemented with other more context-specific indicators.

In Costa Rica the productivity as a future worker of a child born today is **62 percent** as much as it could be. The country ranks **57 out of 157** in the global HCI. For more information on human capital outcomes and the HCI, please see the country two-pager on www.worldbank.org/en/publication/human-capital.

ILLUSTRATIVE OUTCOME AND OUTPUT INDICATORS

- Women, Business and the Law Index. This index measures gender
 equality in the law (how the economic decisions women make are affected by the law), with a larger value showing higher gender equality.
 In Costa Rica, the value is 80 out of 100. This is higher than both the
 average for its region (79) and the average for its income group (76).
- Adolescent Fertility Rate. In Costa Rica, there are 53 births per 1,000 women ages 15-19. This is lower than the average for its region (56) but higher than the average for its income group (45).
- Contraceptive Prevalence. In Costa Rica, 78 percent of women ages 15-49 uses some form of contraceptive method. This is higher than both the average for its region (65) and the average for its income group (56).
- **Social Protection Coverage.** In Costa Rica, **78 percent** of the poorest quintile is covered by social safety nets. This is higher than both the average for its region (65) and the average for its income group (56).
- Open Defecation. In Costa Rica, **0 percent** of the population practices open defecation. This is lower than both the average for its region (2) and the average for its income group (2).
- Hygiene. In Costa Rica, 84 percent of the population has basic hygiene services (soap and water). This is higher than both the average for its region (74) and the average for its income group (78).
- Source of Drinking Water. In Costa Rica, 100 percent of the population has at least basic source of drinking water. This is higher than both the average for its region (96) and the average for its income group (95).
- Cooking Fuel. In Costa Rica, 93 percent of the population primarily uses clean cooking fuels. This is higher than both the average for its region (84) and the average for its income group (81).
- Access to Electricity. In Costa Rica, 100 percent of the population has
 access to electricity. This is higher than both the average for its region
 (97) and the average for its income group (96).
- **Road Traffic Deaths.** In Costa Rica, for every 100,000 people **17 people** die due to road traffic injury. This is similar to the average for its region (17) and the average for its income group (17).

1. Key Indicators on Human Capital

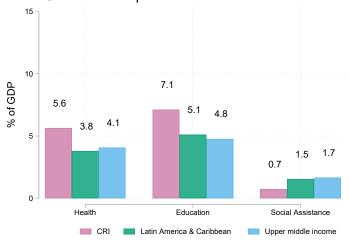

- Large circle=Costa Rica; small circles=other countries.
- Vertical lines separate terciles of the distribution.
- Colors indicate the terciles of the distribution across countries.

DOMESTIC RESOURCE USE AND MOBILIZATION

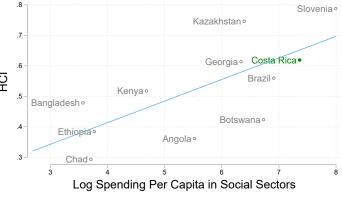

- **Health Spending.** Costa Rica spends **5.6 percent** of its GDP on health. This is higher than both the regional average (3.8) and the average for its income group (4.1).
- Education Spending. Costa Rica spends 7.1 percent of its GDP on education. This is higher than both the regional average (5.1) and the average for its income group (4.8).
- Social Assistance Spending. Costa Rica spends .7 percent of its GDP on social assistance. This is lower than both the regional average (1.5) and the average for its income group (1.7).

2. Government Expenditure on the Social Sectors

 Efficiency of Spending. The HCI in Costa Rica is lower than what would be predicted for its level of per capita government spending on the social sectors.

3. Spending on Social Sectors and HCI

- A selection out of 101 countries in the regression are displayed.

• **Domestic Resource Mobilization.** The tax revenue in Costa Rica is **13.8** percent of GDP. This is lower than both the regional average (17.5) and the average for its income group (16.8).

4. Domestic Resource Mobilization

- A selection of countries are displayed.
- Countries with DRM greater than 33% of GDP are excluded

OTHER RELEVANT INDICATORS

- Human Capital Project. Costa Rica has signed up to be a member of the Human Capital Project.
- Building Human Capital. In Costa Rica, data on the Country Policy and Institutional Assesment rating for building human resources do not exist. The average for the country's region is 4 percent and for its income group is 3.8 percent. This indicator assesses the national policies and public and private sector service delivery that affect access to and quality of health and education services.
- **Identification.** In Costa Rica, **7.2 percent** of the population is not registered. This is lower than both the regional average (7.6) and the average for its income group (8.9).

This country profile is based on most recent data available under the Human Capital Project, the World Development Indicators, Atlas of Social Protection - Indicators of Resilience and Equity (ASPIRE) and Identification for Development (ID4D).
